**Subject:** Microsoft Settlement

To Whom This May Concern:

This email serves as an objection to The Justice Department's proposed settlement against Microsoft Corporation. Microsoft has been found guilty by 2 courts of illegal practices and violating the Sherman Anti-Trust Act. When AT&T was sued by the Justice Department, the company ultimately agreed to be split into different "baby bells." The settlement was punishment against AT&T. The proposed settlement between the DOJ and Microsoft would be a slap on the wrist and would not punish Microsoft for any of the illegal practices they committed.

Microsoft would not be punished if the DOJ proceeds with this proposed settlement. No one would benefit from this settlement but Microsoft.

Thank you:

Landon Hundley
